SUMMARY

Final-year Computer Science undergraduate with hands-on backend development experience in Python, Flask, SQL, and REST APIs across three internships, grounded in Data Structures & Algorithms, OOP, and database fundamentals. Also skilled in NLP, computer vision, and emerging LLM tooling (LangChain, RAG). Built and shipped real-world projects including an ATS resume-scoring platform, cutting manual review time by 70%.

SKILLS

Programming Languages: Python, C++, SQL, HTML, CSS

Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS (Joins, Indexing), Debugging, Version Control

Backend Development: Flask, Streamlit, REST APIs, API Integration, JSON

Cloud & DevOps: AWS, Docker, Git, GitHub

Artificial Intelligence: NLP, Computer Vision (YOLOv8, OpenCV), LangChain, RAG, Prompt Engineering, Ollama

Data & Automation: Pandas, NumPy, Matplotlib, Microsoft Excel, Web Scraping (Selenium, BeautifulSoup)

EXPERIENCE

Python Developer Intern (Remote)

Elevate Labs, Bengaluru

Sept 2025 – Oct 2025

Python, Flask, SQL, AWS, Excel

- Engineered RESTful APIs and backend modules with Flask and MySQL, streamlining data flow and boosting overall system performance.
- Partnered with a cross-functional engineering team to build and deploy Python-based solutions on AWS, improving scalability and system reliability.

Industrial Trainee (On-Site)

TheCoreSystem, Chandigarh

July 2025 – Aug 2025

Python, Pandas, NumPy, Matplotlib, AWS, OpenCV, YOLOv8

- Built and deployed AI- and IoT-driven prototypes using YOLOv8, MQTT, and Dash, integrating live data streams with AWS for real-time monitoring.
- Analyzed datasets exceeding 100K records with Python, Pandas, and NumPy, sharpening reporting accuracy and driving actionable insights.

Industrial Trainee (On-Site)

OOPS Institute of Computer Technology, Kurukshetra

July 2024 – Aug 2024

Python, Tkinter, SQL, OOP

- Designed GUI-based desktop applications in Tkinter with SQL database connectivity, automating daily management workflows.
- Built Bank and Library Management Systems using Python and MySQL, cutting manual effort and improving the end-user experience.

PROJECTS

Smart Resume Analyzer & ATS Scorer

Python, Flask, Streamlit, spaCy, NLP

- Designed and built a full-stack resume-screening system end-to-end with Python and Flask, structuring the parsing, keyword-matching, and scoring pipeline as independent modules for maintainability.
- Implemented text extraction and cleaning logic with spaCy and a real-time skill-visualization layer, cutting resume evaluation time by 70% versus manual review.

INTRA – AI-Powered Employee Support & Decision System

Python, Flask, NLP, SQL, REST APIs, HTML, CSS, JavaScript

- Built an AI-powered employee support platform for automated query handling, ticket management, and knowledge retrieval, reducing dependency on manual support.
- Designed role-based Employee and Admin modules with ticket tracking, knowledge base, notifications, analytics, and centralized support management.

AWARDS & CERTIFICATES

- Software Engineering Job Simulation – JPMorgan Chase & Co.: completed 5 tasks spanning Kafka, H2 Database, and REST API integration.
- Scholarship Award – Rs. 25,000 from Nalin Gupta, Co-Founder, Adidev Ventures (USA), for leadership and technical excellence.
- Digital Productivity Certification – NIIT Foundation, in digital tools and professional communication.

EDUCATION

B.Tech – Computer Science Engineering

Seth Jai Prakash Mukand Lal Institute Of Engineering And Technology, Radaur

2023 – 2027
